Macracote® *Phytamin Plus* range of products are technologically advanced Controlled Release Fertilisers, coated with a unique resin to ensure precision in the release of nutrients in an effective and very predictable manner. Specified longevity is achieved by incorporating a uniquely developed formulation of additives which act as release agents within its tough and flexible resin coating.

The word '**Phytamins**' is derived from *phyta* (plant in Greek) plus *vitamins*. Essentially phytamins, vitamins and hormones are products of one and the same.

Macracote® *Phytamin Plus* is also fortified with potent concentrations of amino acid-mineral complex and essential vitamins which are vital to plant growth and can also assist in fighting stressful situations. Most importantly it contains many growth hormones including cytokines, auxin and gibberellins which can assist in stimulating cell division and larger root systems.
