STORAGE - Troforte® M Professional Native — Landscape Blend has exceptional shelf life and contains beneficial soil microbes that are activated when exposed to moisture. We recommend the storage of opened and unused fertiliser for a maximum of 11 months in a moisture - free environment to ensure best results upon application.

Apply at the beginning of every Spring and Autumn to maximize plant health and vigor.

Troforte® M Professional Native — Landscape Blend is an efficient fertiliser that will feed your plants throughout the growing season based on its longevity. A unique combination of controlled release mechanism through osmotic pressure and biologically mediated processes on mineral ores in Troforte® M Professional Native — Landscape Blend ensures that it efficiently and effectively delivers nutrients to roots by enhancing soil biology around the root zone. It also assists in increasing and sustaining the population of beneficial soil microbes in the soil. Up to 60 natural minerals and up to 24 strains of beneficial soil microbes in Troforte® M Professional Native — Landscape Blend can perform various activities such as nitrogen fixing, nutrient building, producing growth hormones and releasing antibiotic inhibiting disease-producing bacteria and therefore enhancing the self defense mechanism of the plants.
