

Troforte[®] M Trace Element Powder

Slow Release Microbial Fertiliser

0-1-0.6 + TE

TYPICAL ANALYSIS

MACRO ELEMENTS

Total Phosphorus (P)	1.00	%w/w
Insoluble	1.00	%w/w
Total Potassium (K)	0.60	%w/w

MICRO ELEMENTS

Iron (Fe)	9.70	%w/w
Silicon (Si)	8.50	%w/w
Calcium (Ca)	6.51	%w/w
Sulphur (S)	5.75	%w/w
Magnesium (Mg)	3.65	%w/w
Manganese (Mn)	8400	ppm
Zinc (Zn)	7800	ppm
Boron (B)	500	ppm
Copper (CU)	500	ppm
Molybdenum (Mo)	300	ppm
Nickel	40	ppm

APPLICATION RECOMMENDATIONS

Growing Media:

Use 2-3 kg/m³ of growing media

Medium rate is 2 kg/m³

High rate is 3 kg/m³

This product is a blend of naturally occurring ingredients and may have dust at times due to handling beyond manufacturer's control. It is recommended to wear a mask during application.

STORAGE - Troforte[®] M has exceptional shelf life and contains beneficial soil microbes that are activated when exposed to moisture. We recommend the storage of opened and unused fertiliser for a maximum of 11 months in a moisture - free environment to ensure best results upon application.

Apply at the beginning of every Spring and Autumn to maximize plant health and vigor.

Troforte[®] M – Trace Element Powder fertilisers contain a biologically coated specifically engineered mineral base incorporating up to 60 minerals and scientifically balanced blend of up to 24 strains of well researched and trialed Australian cultured beneficial soil microbes. These include bacteria, fungi and algae to carry out wide range of biological activities within the soil such as Nitrogen fixing, Nutrients building, producing growth hormones, decomposing organic matter to organic carbon, protecting beneficial bacteria by releasing antibiotics that can assist in inhibiting disease producing microbes like root rot, fungi and pythium as well as conditioning of soils by improving soil structure. Some of strains included are Azobacter, Azosprillum, Bacilli, Cellulosic fungi, Myxobacteria, Phosphobacteria, Pseudomonas, Rhizobium, Streptmyces, Sacchromyces, Trichoderma, VAM and Yarrowia.

Some bacterial species break down minerals and release potassium, phosphorus, magnesium, calcium and iron to make them plant available and other species make and release natural plant growth hormones like auxins, gibberellins and cytokines.

Troforte[®] M – Trace Element Powder fertiliser are a very efficient, environmentally friendly and economical trace element fertiliser.
